The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests a method for performing a passive voltage contrast on a SOI device including grinding a portion of the substrate with a dimpling tool, then etching the substrate with TMAH and directing a beam of electrons at a backside surface of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
